VINYL SERIES DOOR

The AWS Vinyl Door is an aluminum reinforced vinyl door built in a stile and rail design. Unlike most vinyl doors that are constructed with fusion welded corners, our design incorporates mechanically connected corners that match the look of traditional wood doors giving it a refined appearance that is perfect for any home or office.

Built using the same award winning AWS hardware as the AWS Aluminum Door, the Vinyl Series Door is our more affordable version.

COLOR AND FINISH OPTIONS

Vinyl Color Options:

White Vinyl, Almond Vinyl,
Bronze Exterior laminate with
white vinyl interior

ALUMINUM with AWS Insulated Core

The AWS Aluminum Series Door offers ultimate versatility and options. This energy efficient thermally broken door utilizes our AWS Insulated Core technology for optimal thermal performance. Now you can have the durability and beauty of aluminum while enjoying maximum comfort and energy savings.

Available in sizes up 120 inches high and/or panel widths of 40 inches, the Aluminum Series doors can be built to fit any size opening no matter what the width.

Standard Woods: Alder, Fir, White Oak
Premium Woods: Cherry, Mahogany,
Black Walnut

AWS Insulated Core Energy Efficient Doors

The all new AWS Insulated Core energy efficient doors by AWS combines our unique design with “Home Comfort” materials to ensure your home or business are protected year round from the cold and heat outside. With AWS Insulated Core technology, your home will not only look great, it will feel great too!

1. CONCEALED HINGES:

All hinges/pivot points are concealed for more pleasing aesthetics and architectural sight-lines.

2. INDEPENDENT SLIDING PANELS:

No hinges, no binding, no sagging. AWS Door panels glide with a smooth and easy functionality along the bottom track.

3. INTERLOCKING PANEL SYSTEM:

Interlocking "tongue and groove" panels provide for security and performance against the elements.....without the need for additional locking mechanisms.

4. HANDLE & HARDWARE OPTIONS:

A variety of door handle styles and finishes to choose from. Multi-point locking is standard on all door systems.

5. MULTIPLE FRAME TYPES:

Choose from a Narrow Aluminum Block Frame or a Vinyl Outer Frame with or without a Nail Fin.

6. BOTTOM TRACK SUPPORTED:

Utilizing either our 1" Flush Track or our 1-5/8" Up-stand Track, both systems are designed with the load of the panels being directly supported by the bottom track and not the header track.

7. SLIDE-N-PIVOT OPERATION:

Utilizing our innovative, AWS hardware system, the door panels slide-n-pivot independently for a fuller, clear opening.

8. IN-SWING OR OUT-SWING:

Choose between in-swing or out-swing door operation.

** Note: Nail-fin and Retro Outer Frame is available in out-swing only.*

HOW THE AWS DOOR SYSTEM OP-

STEP 1: OPEN ACCESS DOOR

Turn handle to open the access door.

STEP 2: SLIDE PANEL AND PIVOT TO OPEN

Slide the next panel over toward the open access door. When in position, the sliding panel will click into place and pivot open.

STEP 3: CONTINUE WITH REMAINING PANELS

Continue the same process with the remaining panels.

A DOOR FOR ALL USES

Designed with the modern home and business in mind, the AWS Door is a versatile system that works perfectly for the home, office or restaurant setting.

Big open spaces are accentuated with the AWS Door. But it does not stop there. Because AWS Door is a hinge-less system with free floating panels, you control the opening to fit your needs.

We stripped away all the constraints inherent with the 'hinged' systems. Because we do not have panel-to-panel hinges, you get to choose how your door opens. With the AWS Door you (not the door) get to decide how many panels are open or closed at any one time.

Experience the ultimate in flexibility and ease of use with both our vinyl and aluminum doors with AWS Insulated Core total comfort.

MULTI-POINT LOCKING

All of our AWS Door Systems come standard with a multi-point locking system on each access door. The sliding panels integrate with the access door to provide security.
