

Vinyl Patio Door

The American Window Systems Patio Door combines all of the features that you want in a door. It provides ease of operation and excellent performance.

The welded frame and sash offer increased structural integrity with a greater viewing area. It has dual fin seal weather-stripping on the full perimeter of the sash and a deep pocket interlock for enhanced energy efficiency. Available with attractive handles and stainless steel two point locksets for enhanced security, also tandem stainless steel precision rollers for ease operation and durability. These doors come in White, Almond, and Clay solid vinyl.

Features & Benefits

- Welded frame and sash enhances structural integrity and eliminates corner leaks.
- Narrow frame and sash profile provides an increased viewing area.
- Multi-chambered frame and sash construction enhances thermal and sound transmission characteristics.
- Weather-stripping on the internal perimeter of frame and the full perimeter of the sash provides superior resistance to air infiltration. Eliminates drafts and provides enhanced energy efficiency.
- Low-E³ insulated glass is up to 25% thicker than other doors. Keeps your home comfortable and quite.
